SUMMARY
7

My experience

- Had a lot of fun
- Saw the differences in our cultures
- People were very kind and welcoming
- Not many speak English because of the school system
- Great architecture and art

The workspace

I worked at a centre for people with disabilities and were welcomed with a lot of love and joy by everyone.

Our main activity was watching over the people while working on some projects with them.

We were invited to their party that they have once a year to drink and eat.

VICENZA

It's the perfect place for a architecture and art oriented stay and is located right between Venice and Verona which makes it even better if you want to visit those places, too.

Summary

Overall it was a great experience and I can only say that I'd do it again with the help of Erasmus+.

Thank you for watching my presentation. I hope you enjoyed it.
